

Accudata Cloud: Tape to Cloud Data Sheet

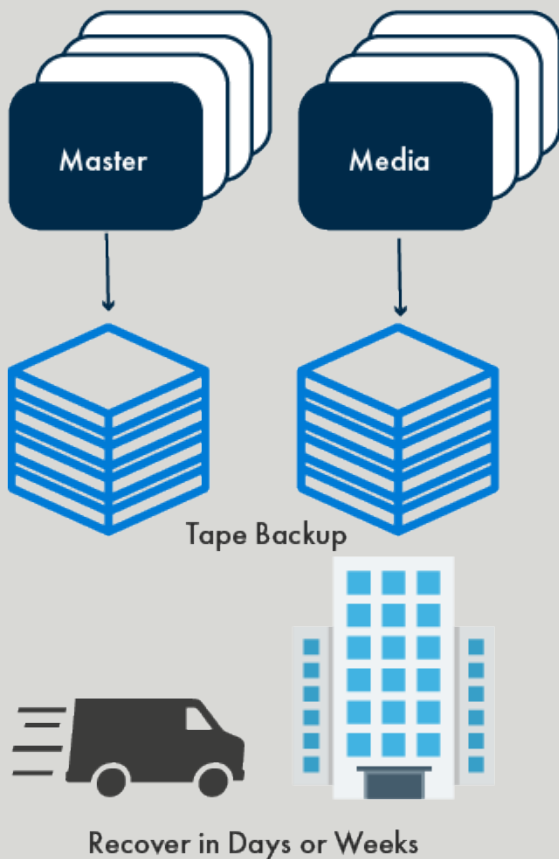

Reduce Complexity by 70%

For most, legacy tape back-up is still the norm, requiring days and sometimes weeks to access critical data. What if you could back up to the cloud, have guaranteed access within seconds, and see a near-immediate ROI?

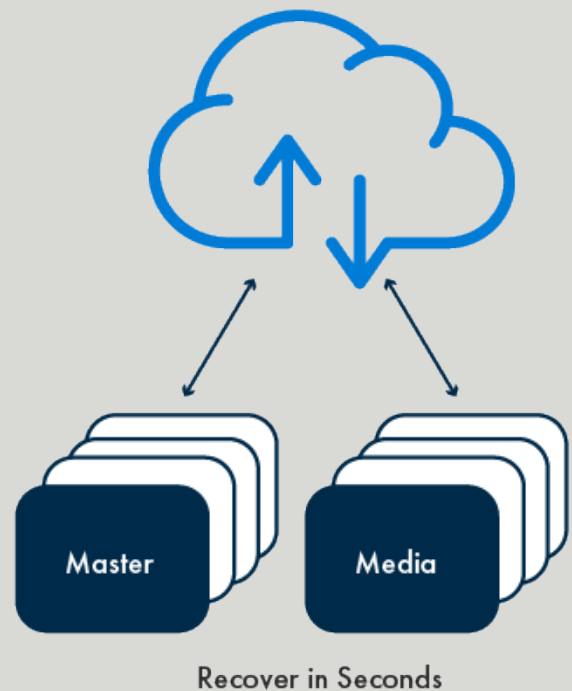

Getting from Days and Weeks to Seconds

Imagine, immediate savings by reducing your data center footprint, data recovery in mere seconds, and significant reductions in daily systems management. Envision a better future — it really is this easy.

LEGACY TAPE BACKUP

HYBRID CLOUD BACKUP

The Process is Simple

Accudata's cloud team has developed a proven process to help you go cloud and never look back. Gone are the days of waiting games — enter immediate gratification, and a newfound confidence in backup and recovery. Just what you and the c-suite are looking for. Here's how it works:

KEY BENEFITS

- Decreases cost of storage
- Decreases cost of capital investments
- Provides geographic redundancy
- Facilitates simplified management
- Provides improved reliability and faster restore
